

1 March 2024

Dear Valued Clients,

Please view the important update regarding our consulting fees, which will be effective from 1st April. We have carefully reviewed our pricing structure to ensure that we continue to provide the high-quality service that our clients expect. As part of this review, we have made some adjustments to our fees in order to better align with the value that we offer. These changes are necessary to support the ongoing improvement of our services and to ensure that we can continue to meet and exceed your expectations. We greatly appreciate your understanding and continued support as we implement these changes.

We will be implementing a minor adjustment representing a 8% increase in our service fees to further propel the development of cutting-edge AI solutions and improve e-visa compatibility, ultimately elevating the quality of your travel experiences.

In light of the ongoing advancements within the consulting landscape of the tourism industry, our focus remains steadfast on enriching our services to better meet your travel requirements. This fee adjustment is a strategic move towards offering tailored and efficient travel solutions through the integration of AI technology and streamlined e-visa procedures.

The adjustment, while subtle, plays a pivotal role in our continuous commitment to deliver innovative solutions and top-notch consulting services, aimed at enhancing your travel adventures. We are confident that these enhancements will simplify your travel arrangements and elevate the overall quality of your journeys, ensuring a seamless and enjoyable experience.

Should you have any queries or require further clarification regarding the fee adjustment, please do not hesitate to contact us. We deeply value your continued support and eagerly anticipate the opportunity to provide you with exceptional consulting services that embody excellence and innovation within the tourism industry.

Thank you for your understanding and ongoing partnership.

Regards,
Visas Zone Management
